

A COMPLETE SOLUTION FOR SECURING YOUR PERIMETER

INTEGRATING MAGOS END-TO-END PERIMETER SECURITY SOLUTIONS WITH AVIGILON POWERFUL VIDEO MANAGEMENT SYSTEM

Magos' best-in-class ground-based radar, combined with its advanced area surveillance software (MASS) capabilities, can seamlessly integrate with Avigilon's video management system to deliver an easy-to-use, smart solution for perimeter protection.

This solution enables users to detect all types of threats, regardless of weather or lighting conditions, even in highly challenging cluttered environments. Using Avigilon's VMS, the user can get real-time alerts and visuals based on detection data sent from the Magos radar.

COMPLETE CONTROL

Avigilon's VMS has access to the MASS client for full control and management of the software

KEEP TRACK OF YOUR DATA

With the Avigilon VMS, you can connect PTZ cameras to the alarm zones, record, log, and track video and MASS channels, and perform detailed analyses of triggered alarm scenarios

REAL-TIME ALERTS

By using MASS, the PTZ automatically slew-to-cue to the targets and provides a relevant video feed via Avigilon's VMS

SUPPORTED/ COMPATIBLE VERSIONS

MASS 3.X and above / ACC 6 and above
*POS Module in the ACC per alarm zone is required for licensing. The integration is available globally

BENEFITS

- The ideal solution for complete perimeter protection by combining Avigilon's VMS recording capabilities and Magos' supreme and exact detection abilities.
- Installation is easy and quick, with no site customization required.
- A single user interface for recording video, tracking targets, and getting alerts.
